Lérez Up began as a **meeting point** for fans of Japanese or Korean culture, video games, manga and anime. It is also a place to discover other ways to spend your free time, from art workshops and role-playing to unconventional board games and screen-free activities.

The event also has an educational focus, with professionals from different fields (art, illustration, video games, cosplay and technology) sharing their skills and experience through talks, panel discussions and workshops.

A family event for all ages, with a wide-ranging programme of activities for every taste: Cosplay and K-Pop competitions, console tournaments, virtual reality, sports such as fencing and kendo, indie video game demos and even a concert featuring music from films, series and video games.

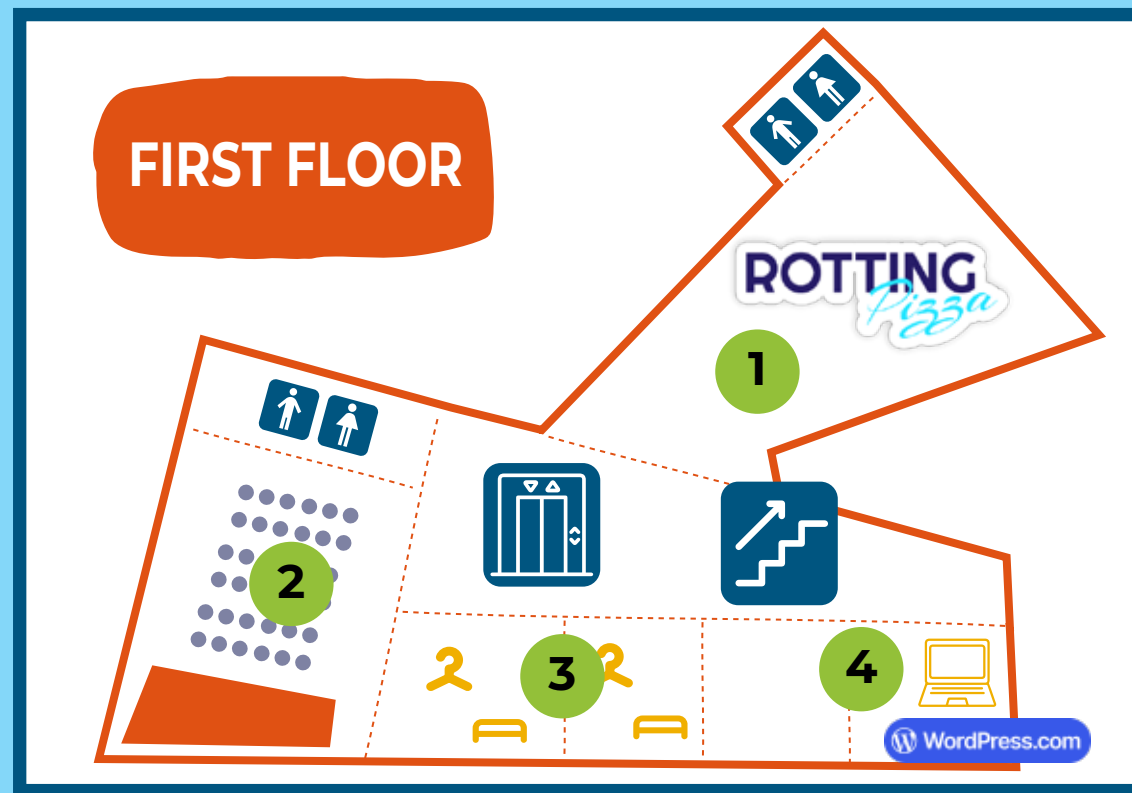

This event is made possible by the support of **Pontevedra City Council**, our **sponsors and partners**, and the entire **organising team and all our volunteers**.

It grew out of a small association that started in 2016 with four computers. Six years later, in 2022, it decided to dream big and put on a gaming and leisure event in Pontevedra, attracting 3,000 visitors to its first edition.

Thank you for coming to our little project, which grows bigger every year :)
